Questions:	1	10					11
Respondee		What would assist your business to thrive in the parish?					
	What is the Nature of your business?	Better communications	Better Transport / Roads / Parking	Better General Infrastructure maintenance	Other facilities provided or improved	Planning policies	Final thought / comments on ways to support and sustain your business based in the parish ?
1 Ariadne	Geological consultant / Business Development Consultant	Faster broadband, Mobile phone reception; reliable trains to London	Better roads to Totness and in parish	Yes of transport and communications	Selective parking restrictions within parish	No further 'unaffordable' / 'second home' developments - any development should be focused on building a sustainable community and redressing the imbalance between 2nd homes / holiday homes and residential accommodation for those who live and work in the community.	
2	Hotel	Reliable superfast broadband, Mobile phone signal	Roads repaired to an acceptable standard, reduced parking charges especially in beauty spots and coastal areas - maybe one hour free	Simple procedures to keep roads clear and repaired; better power and water supplies; and sewage system.	Planning should also be receptive to building / converting buildings for 'high-end' luxury flats / housing for older residents to downsize releasing larger properties.	More 'infilling' not building on green field sites - give preference to redundant buildings and brown field sites. Stop solar farms encourage solar on all industrial new build roofs. Encourage all buildings should be 'in-keeping' with the area. Renewable power	Encourage 'work from home'. Need good communication system. Plan for any housing to be truly affordable based on earnings + (rentable + buy). Housing should be retained for local people not holiday homes i.e Trust or Charity based. Provide housing for the local potential workforce needed for this area.
3	Farming	Broadband connection snail pace (computer speed essential today) Mobile phone mast to cover all the parish	Repair potholes regularly. Reduce the cost of parking to assist the tourist industry - try harder to get the parking off the roadside	Those that are involved want to forget the paperwork and practically do something - get your hands dirty.		Have become too personal - not creating housing at the right price for the next generation.	The parish must consider how it retains younger people for my business and the support of our retired population.
4	* Take Holiday guests in my house, on self catering basis * Run basket making (crab pots) courses & make baskets and paintings.	Better internet connection & speed. Other people living in the village as an arts network. People who can help with change-overs occasionally.	Not an issue usually, though probably because I have use of the next door neighbours. It would be really helpful to have toilets & parking on rough ground by coastguards and stream.	Reading room and fishing store are sufficient for needs at present. Mostly I work from home.	Business and publicity advice. Willow growing plots	General support for entrepreneurial businesses - tourism promotion.	My basket work is mainly supported through Basketmakers Association & regions SW group. I would like to set up a local willow plants in valleys - but not on my own. Lack of people to share & cooperate with is the main problem.
5	Crab fishing	Suitable access to my stores in Inner & Outer Hope and better phone / internet connections by mobile when working.	Not having access to stores blocked by parked holiday traffic on road and slipways	Roads without so many potholes. Drains and hedges maintained. Telephone links not failing. Better harbour for safety of boats.	Although I fish same area as when I had a smaller boat kept at Hope the current harbour wall & slipway access is not suitable for my 10m. Boat so I must journey to Salcombe to E. Rutts & Bigbury Bay to fish	Plan to consider function of harbour & relevant structure around tourism and beyond remit & finances of harbour commissioners.	* encourage young families and diversification of small businesses to enable younger people to work in villages and not migrate away. * Support to entrepreneurs would add to regional character and benefit tourism. * AONB or National Trust visitor cabin in Inner Hope for local information - on waste ground by stream.
6	Farming storage & tourism	Better broadband, better mobile reception	Well maintained roads. More and better parking facilities at main tourist destinations.	Would like to see improved maintenance & cleaning of beaches, public toilets, public spaces (including more emptying of bins and rubbish collection) & road signs.	Continued support to maintain footpaths, stiles & provide pedestrian gates to protect livestock.	Policies should support the introduction & expansion of local businesses. Support the need for housing for local people & <u>ignore</u> government targets.	
7	Hope Cove Harbour Commission	More mobile phone would be a great asset.	Better signs to restrict access to the harbour would be a great advantage	Funds to introduce a regular maintenance program would benefit Harbour users.	Help to introduce outside taps; better rubbish disposal; assistance with beach cleaning	Restrict with regard to any development regarding capacity of drainage system in case of breakdown effluent ends up on the harbour beach.	Because the harbour commissioners only hold and raise limited funds the upkeep of the harbour and seawall is at times difficult. It is proposed to introduce a 'patrons' type scheme to help raise money. It is sometimes difficult to maintain Hope Cove's major asset.
8	B & B	Good phone & broadband and mobile coverage	Potholes and road surfaces need more attention. Yellow lines needed at Hope Cove, T junction at start of New road and again on corners over the New road extremely dangerous during holiday times.	Pretty good only problems I can think of is litter in peak season and the usual irresponsible dog owners who spoil things for the more responsible dog owners!		Well there is another problem! Seems like a continuous battle over the past year or so.	The village needs to maintain its picturesque quality and character as this is what encourages tourists to keep coming back, so it must not be overdeveloped and the holiday / 2nd home owners should be carefully controlled somehow as this is killing the small hotel business
9	B & B	Wider marketing, more communication between similar businesses in area (room availability)	Retain parking on New Road	Road surface repairs, speed sign on lanes	Litter management, beach cleaning	Retain hotels / B & B do not allow to become private residences	Adopt St. Ives planning restriction on second homes.
10	Hotel	Fibre optic broadband to hotel	Another public car parking place and double yellow lines	Potholes filled in		Control second homes all new build only for locals to live in. Tax second home owners to help build cheaper local homes	Help raise money to defend the harbour wall and coast path.
